AMENDMENTS TO THE SPECIFICATION

In paragraph [0014]:

5   Please refer to Fig.4A. Fig.4A is a detailed sketch map of the data structure of the
defect table DT. As shown in Fig.4A, the ~~data~~ spare area SA(n-1) on the track 24 contains
spare block S0. The spare area SA(n) has spare blocks S1 through S16. The data area
DA(n-1) includes data blocks Dx through Dy. The data area DA(n) includes data blocks
D1 through D7. In the defect table DT, the data block DTB(n-1) is mainly used to record

10   the usage status of corresponding spare blocks in the spare area SA(n-1). In every entry
28 that maps to one spare block Bs records one status information 29A, one spare block
Bs address information 29B, and one data block Bd address information 29C. The spare
block Bs address information 29B records the spare block Bs address mapped to this entry.
To facilitate further discussion, three entries are marked 28A, 28B, and 28C respectively

15   in Fig.4A.
